EXPERIENCE

Two Barrels
Software Engineer

Oct 2022 – Present
Spokane, WA

- Implemented a cross-project initiative to improve storing invoice items that improved query speed and supported future development
- Built a new access management system and landing page for reporting, improving security and ease of access to reports company-wide
- Helped mentor new developers on the team to grow into their roles and speed up development
- Led project deployments of changes from multiple repositories effectively, triaging and resolving any resulting issues

Two Barrels
Junior Software Engineer

Apr 2022 – Oct 2022
Spokane, WA

- Fixed various bugs and implemented features across various projects on the operations team
- Collaborated with analysts to improve organization of company data for better reporting
- Developed new expense tracking for orders to facilitate better business decisions
- Worked as part of an agile team to handle tickets, coordinate work, and communicate/test issues with project managers

ASC Machine Tools
Software Developer

Apr 2021 – Apr 2022
Spokane Valley, WA

- Worked with electrical engineering team to discover internal/external needs and build tools to optimize those processes
- Did full-stack development, designing interfaces, managing databases, writing tests and documentation
- Helped modernize software engineering practices by introducing source control, unit testing, and bug/feature development tracking to own projects
